Decommunization, decolonization of Ukrainian culture and politics

Anti-Western propaganda is one of the key ideological foundations of the Russian state

Swedes Protest Against NATO while Germans Want Cheap Russian Energy Back. Russian Media Monitoring Report, 17-23 April 2023

2023-05-01 16:01 Russian media keep saying that the Ukrainian counteroffensive is doomed. Last week, the propagandists claimed that Russian army excels at defensive warfare. The disinformation media tried to exonerate Wagner PMC after the testimony of former mercenaries sharing grim details of murders of Ukrainian

# I. Russian Propaganda: Adaptation and Change in Ukraine

**1** Today, Russian propaganda cannot promote the concept of the 'Russian world' in Ukraine. Therefore, another strategy has been chosen.

02

Russia no longer tries to present itself as the best country. Instead, its efforts focus on discrediting Ukraine as a state, portraying the Ukrainian government as illegitimate, and undermining Ukraine's foreign policy course

The primary task of Russian propaganda is to shift the blame for starting the war onto others. The main targets are the central Ukrainian government and NATO/the West

# I. Russian Propaganda: Adaptation and Change in Ukraine

05 Operations are being carried out to undermine people's confidence in the government's honesty. If doubts about the truthfulness of the leadership and the military elite are sowed, it becomes a powerful weapon of disintegration

06

It is crucial to sow doubts about the sincerity of Ukraine's allies, particularly NATO and the West, to undermine trust and confidence in their support

# **II.** Narratives that do not find support in Ukraine

# 2012-2013

Russia wants peace, while the West wants war

04 NATO/EU countries want to divide Ukraine

# III. Narratives that resonate in Ukraine

Russia is waging war against NATO/the West in Ukraine

The West will make a deal with Russia in its own favor at Ukraine's

NATO/the West is using Ukraine to achieve its own selfish goals

Ukraine could have negotiated peace with Russia in the spring of 2022

# IV. Narratives: old ones, those born during the war

Ukraine's accession to NATO will lead to World War III

The West forcefully imposes liberal and LGBTQ+ values

Ukraine wanted to join NATO, and Russia could not allow it because it would violate its national security system

Ukraine should not become a member of NATO because it will cause even more confrontation

Ukraine and Russia are brotherly nations, and the Ukrainian government has spoiled relations between them

The Maidan was provoked by the West. Maidan was an unconstitutional coup

Ukraine/Zelensky is a US puppet

Kyiv authorities started a civil war in Ukraine to suppress protests in the East of the country, under the direction of the West

A network of secret American biolabs operated on the territory of Ukraine

The West seeks to take control of Ukraine's resources

Poland, Hungary, and Romania want to divide Ukrainian lands

Russia does not threaten Ukrainians but merely seeks to unite forces with them in a crusade against the West, which has conspired with the most insignificant politicians to exploit Ukrainian blood for its own selfish goals

Putin is defending the Orthodox religion. And NATO, the West, and the Vatican seek to impose their religious norms.

The Russian military was not involved in massacre of civilians in Bucha. This is a provocation/staging by Western countries.

# V. Social Media in Disinformation and PsyOps

# 01

## Shift in information consumption

Routine monitoring: air raids, shelling, frontlines updates. 73.4% of Ukrainians rely on social networks for news <u>OPORA, 2024</u>

#### 02 Social media as a resource

# 03

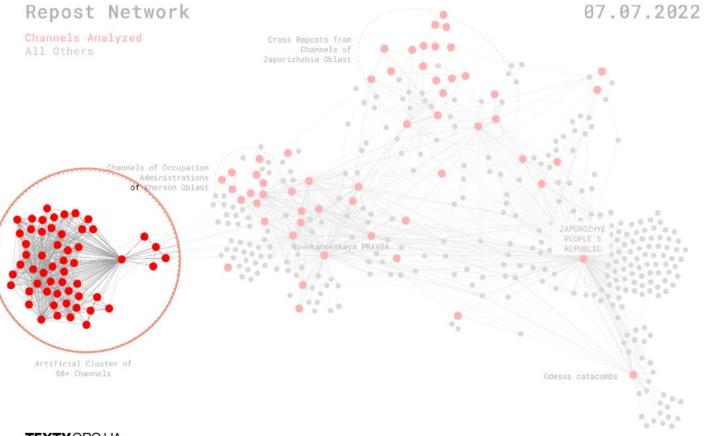

#### Algorithms and user engagement

Content tailored to user preferences to maintain engagement. Algorithms amplify emotionally engaging content. 04
